GRABO® High-Flow Base Add-On lifting capacity

NOTICE The GRABO® High-Flow Suction Plate 300 was tested up to 100 kg (220 lbs) at maximum lifting force under ideal conditions. However, this figure is the breaking point under optimal lab testing conditions and must never be reached in real-world applications!

Local regulations require different safety margins to be used, and the official tool Working Load Limit (WLL) is set with a 30% safety ratio and can be seen in the lifting force chart above.
